BIRUK SIMON

WEB DEVELOPER

Detail-oriented Full-Stack Web Developer and Software Engineering student at Jimma University with practical experience in designing and developing web applications using HTML, CSS, JavaScript, React.js, Node.js, Express.js, NestJS, and MySQL. Demonstrated ability to build secure, scalable, and user-friendly applications through projects including a Student Registration and Management System, an Apple-inspired e-commerce platform, and an AI Web Security Analyzer. Strong focus on backend development, problem-solving, and database management, committed to leveraging technical expertise and continuously adopting new technologies to deliver effective web development solutions.

Jimma

KEY SKILLS

- **Frontend Development** - HTML5 - CSS3 - JavaScript (ES6+) - React.js - Bootstrap - Responsive Web Design **Backend Development** - Node.js - Express.js - NestJS - RESTful API Development - User Authentication and Authorization **Database Management** - MySQL - PostgreSQL **Programming Languages** - JavaScript - Python - Java - C++ **Development Tools** - Git and GitHub - Visual Studio Code - MySQL Workbench - Postman **Other Technical Skills** - Object-Oriented Programming (OOP) - CRUD Operations - Database Design - Software Debugging and Testing - Problem-Solving

EDUCATION

Bachelor of Science (BSc) in Software Engineering
Jimma University – Jimma Institute of Technology (JiT)
Jan 2022 - Feb 2028

PROJECTS

AI Web Security Analyzer

- Developed the AI Web Security Analyzer, a tool designed to identify potential security vulnerabilities in websites and web applications. Created backend APIs with Python and FastAPI to perform website scanning, source-code analysis, URL security checks, SSL certificate inspection, and health monitoring, enabling users to understand and mitigate website risks effectively.

Apple-Inspired E-commerce Website

- Developed an Apple-inspired e-commerce website with a modern, responsive design, enabling seamless product browsing, category navigation, and detailed product views. Integrated user authentication and administrative management features to support both customers and site administrators. Utilised React.js, JavaScript, Node.js, Express.js, and MySQL to build robust frontend and backend functionalities, ensuring a cohesive and efficient online shopping experience.

student registration and database management system

- Developed a web-based Student Registration and Management System to streamline enrollment and academic administration. Implemented functionalities for students, parents, teachers, and administrators, featuring user authentication, role-based access control, course and grade management, attendance tracking, and comprehensive student information management. Utilised Node.js, Express.js, MySQL, and server-side rendering to build an efficient, role-specific platform.

ADDITIONAL INFORMATION

- Full-stack web development
- Backend development expertise
- Database management skills
- Problem-solving and analytical thinking
- Technical adaptability and continuous learning
